

Peptide Therapy

Targeted peptide protocols for recovery, sleep, skin, libido, and longevity — prescribed and supervised by a full-authority nurse practitioner. Never research-grade. Never gray-market.

\$49 Consult

Licensed US Pharmacy

NP-Supervised

What Is Peptide Therapy?

Peptides are **short chains of amino acids** that act as signaling molecules — telling specific cells to do specific things. Most are self-administered as small subcutaneous injections, similar to an insulin pen, on a cycle your provider designs and adjusts as you go.

\$49

Peptide consultation with our medical team

\$250–\$600

Typical monthly protocol, by peptide & supply length

THE PEPTIDES OUR CLIENTS REQUEST MOST

HEALING & RECOVERY

Why Hello Gorgeous

Family-owned, NP-directed, and here longer than most competitors have been open — same experienced hands, authentic product, honest pricing.

#NoGrayMarket

#RealOversight

WHAT TO EXPECT AT YOUR APPOINTMENT

STEP 1 Consult

- \$49 with our medical team
- Goals, history, medications

STEP 2 Labs

- If indicated for your protocol
- Informs dosing & safety

STEP 3 Protocol

- Written dose, frequency, cycle
- Self-injection training included

STEP 4 Follow-Up

- Ongoing dose adjustment
- Included — not a one-time sale

EVERY PROTOCOL PRESCRIBED BY RYAN KENT, FNP-BC

Peptides at Hello Gorgeous are sourced exclusively from licensed US compounding pharmacies — never internet vials, never gray-market, never research-grade. Full prescriptive authority, on site 7 days a week.

SLEEP EFFECTS

Often noticeable in the first 1–2 weeks of a sleep-supporting protocol.

SKIN & LONGEVITY

Typically 8–12 weeks for visible changes — consistency matters more than speed.
