Hello Gorgeous *Med Spa*

OSWEGO, IL

Upgrade your *glow.*

Already booking microneedling or a laser treatment? Add a booster in the same visit and get more from the time you're already in the chair.

ADD-ON MENU · WITH ANY MICRONEEDLING OR LASER VISIT

PRP — $250

YOUR OWN PLATELET-RICH PLASMA

Made from a small blood draw and applied during microneedling to support healing, texture and radiance.

Exosomes — $395

OUR MOST ADVANCED RECOVERY SERUM

A growth-factor-rich topical applied after treatment to help skin look renewed, calmer and smoother.

PDRN — $225

THE "SALMON DNA" SKIN BOOSTER

A hydrating, soothing topical worked in after needling or laser for a fresher, more even-looking glow.

Baby Tox — $229

LIGHT, NATURAL-LOOKING JEUVEAU

A micro-dose of about 20 units to soften lines while keeping expression. Placed last, after your laser, by our provider.

BUNDLE & SAVE

The Glow Stack

PRP + PDRN

$425 ~~$475~~

The Full Gorgeous

PRP + Exosomes + PDRN + Baby Tox

$899 ~~$1,099~~

Ask for your upgrade at check-in.

Add-ons are booked with a microneedling or laser service.

hellogorgeousmedspa.com/book

74 W. Washington Street, Oswego, IL 60543 · Mon–Fri 10–8, Sat–Sun 10–5. Provider consultation required. Exosomes and PDRN are cosmetic topical products. Results vary. Pricing is an add-on rate with a qualifying service and may change.

Hello Gorgeous *Med Spa*

OSWEGO, IL

Why upgrade your *treatment?*

Your microneedling or laser visit is already the main event. A booster helps you get more from it.

WHY ADD ONE TODAY

- Needling and lasers open tiny channels in the skin, which makes it a good moment to add skin-supporting ingredients.
- You're already here, so an add-on is a few extra minutes, not another appointment.
- Treatments create the stimulus. Boosters give your skin more to work with while it recovers.
- Add-on pricing is lower than booking the same boosters on their own.

WHAT EACH ONE ADDS

PRP — $250

Made from your own blood, so nothing foreign. Small studies suggest better texture and scar results when paired with microneedling.

Exosomes — $395

Applied to freshly treated skin to help it look calmer, smoother and more renewed. Our premium recovery boost.

PDRN — $225

Soothing and hydrating. The gentlest option, great for first-timers and sensitive skin.

Baby Tox — $229

Small doses soften lines and keep your expression. Pairs well with tightening, since one treats skin quality and the other treats movement.

Why it's worth the money

- Collagen-building treatments are a real investment, and a booster protects it.
- Many clients tell us they can see and feel a difference in their skin. Results vary and aren't guaranteed.
- One well-chosen add-on can mean fewer visits to reach the look you want.
- A $225 booster on a $600 treatment is about a third more for a more complete visit.
- The Glow Stack (PRP + PDRN) is $425, and The Full Gorgeous (all four) is $899.

Ask the front desk to add an upgrade today. **(630) 636-6193**

74 W. Washington Street, Oswego, IL 60543. Provider consultation required. Exosomes and PDRN are cosmetic topical products. Results vary. Add-on rates apply with a qualifying service and may change.

Hello Gorgeous *Med Spa*

OSWEGO, IL

The science, *simply.*

Here is how each upgrade works and what to realistically expect.

PRP

YOUR OWN GROWTH FACTORS

What it is: A small blood draw is spun to concentrate your platelets in plasma.

How it works: Platelets carry growth factors that tell skin cells to repair and build collagen. Microneedling starts the healing response, and PRP adds more of those signals.

What to expect: Studies on acne scars show promising results with microneedling plus PRP, but they are small and varied.

Exosomes

CELL-TO-CELL MESSENGERS

What it is: Tiny packets that cells release to pass signals to each other.

How it works: Applied to freshly treated skin, they are thought to carry signals that calm irritation and support repair.

What to expect: This is a newer area and research is still early. We offer it as a cosmetic recovery boost, not a medical treatment.

PDRN

SOOTHING AND HYDRATING

What it is: Purified DNA fragments, usually from salmon, long used in wound-care research.

How it works: It is believed to support the skin's natural repair process and calm inflammation.

What to expect: A gentle option with a good track record in healing. Evidence for cosmetic use is smaller, so we describe results as support, not a promise.

Baby Tox

SOFTER LINES, NATURAL MOVEMENT

What it is: A small dose of Jeuveau, a purified protein that relaxes targeted muscles.

How it works: It blocks the nerve signal that makes a muscle contract. Less movement means lines crease less deeply, and a low dose keeps some expression.

What to expect: This is the best-studied of the four. Results depend on your provider and your dose, and it is placed after your laser.

Good to know

Your treatment does the heavy lifting. Upgrades are designed to support it, and every person responds differently. Your provider will tell you which one makes sense for you.
